

The Fleetguard® Advantage.

Nothing Guards Like **Fleetguard**.

Cummins Filtration offers a full line of filters specifically engineered for a wide range of systems. With advanced design and high quality performance, Fleetguard heavy duty filters give customers the ultimate protection for all of their equipment.

Meets OEM specifications - Fleetguard engineers all products to meet or exceed OEM specifications to ensure engines and other systems get maximum life.

Backed by the best warranty in the business - With the most inclusive and comprehensive warranty in the industry, customers can have total confidence in their purchase.

Filters for every fleet - Fleetguard has over 8,300 products covering the widest range of air, lube, fuel and hydraulic filters in the heavy duty industry.

Systems approach - We don't just provide parts. We are a comprehensive supplier to support the maintenance of systems from fuel to cooling systems.

Leverage the **Advantage**.

Why All-Makes?

Fleetguard filters allow your dealership to offer all-makes solutions, no matter the brand or type of equipment customers own. It's your key to increasing sales and profits by ensuring your customers purchase all filters from you – for their entire line of equipment. Become a valued supplier by carrying Fleetguard filters, the brand your customers trust.

One-stop-shop

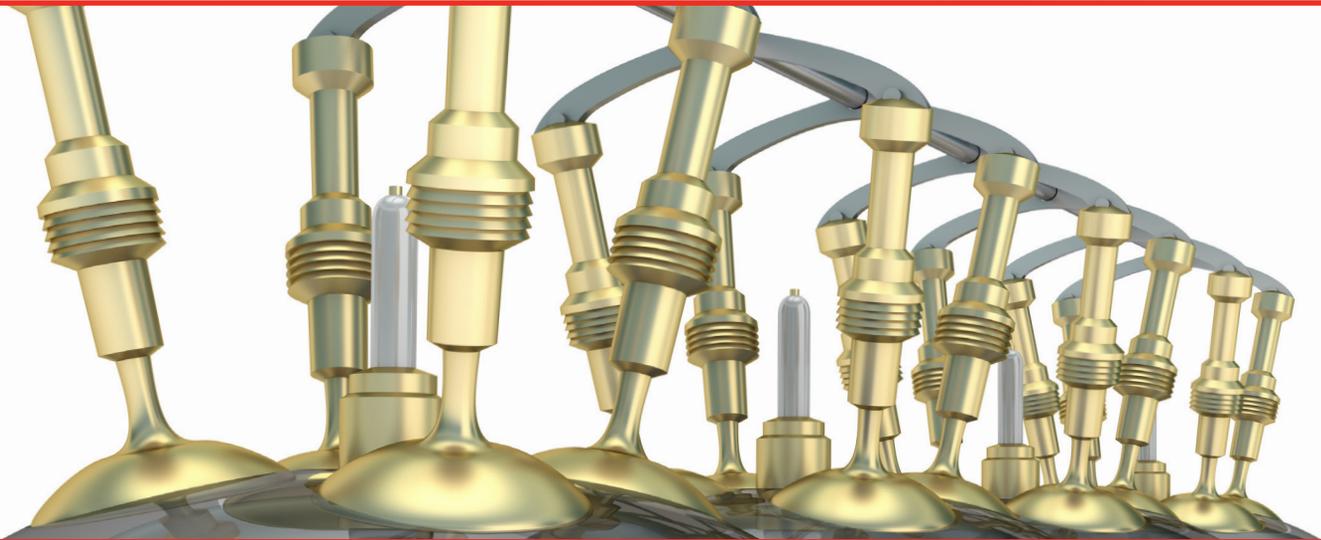

Fleetguard filters help you become a one-stop-shop for your customers, allowing you to maximize your current customer base and attract new customers in diverse markets you may not already reach.

Build customer loyalty

Offering an all-makes filter program helps you build customer loyalty and boost repeat business. Plus, it gives you an opportunity to up-sell other products, enhancing your sales and profitability.

Easy and convenient

Your customers will appreciate the convenience of getting products from one source, with just one numbering system to remember. You'll enjoy the opportunity to sell more filters to more customers.

Fuel Filtration **Systems.**

Our comprehensive line of fuel products, including NanoNet™, offers optimum protection from contaminants like dirt and water, an engine's biggest enemies.

NanoNet fuel filters offer:

- 3x better particle removal and retention in comparison to competitors
- Extended service intervals nearly 2x longer in comparison to competitors
- Protection to fuel injectors, avoiding costly failures

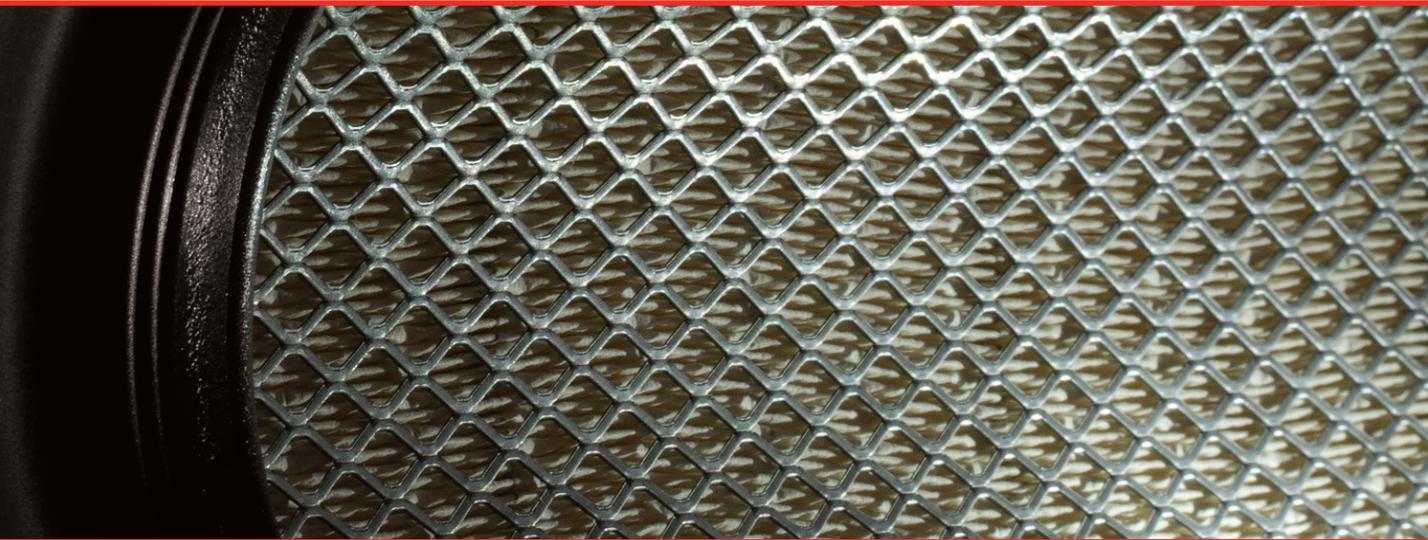

Lube Systems.

Evolving global emissions standards are principal drivers in changing engine technology. The new technology poses several demanding challenges for lube oil systems, including conditions that can seriously affect engine performance and equipment life.

The Fleetguard Lube Filter featuring **NanoNet** media:

- Captures and retains contaminants that can damage the engine
- Allows for high efficiency throughout the life of the filter
- Has lower restriction and improved cold-flow ability on engine start-up

Air Intake **Systems.**

Intelligent design and rigorous testing on air products, like Direct Flow™, ensure our products meet global OEM specifications for maximum quality and performance.

Fleetguard Direct Flow products feature:

- A unique air intake system with integrated ports in the housing; along with sensors to monitor the performance
- A modular housing design that allows for easy installation in a variety of applications

Coolants and Fuel Additives.

Our advanced line of field and laboratory tested products help avoid costly cooling system issues and ensure easy maintenance, offering customers complete protection.

- Fleetguard ES Compleat™ OAT offers 3X better liner pitting protection than competitive OAT coolants
- Fleetguard Fuel Additives provides fuel line freeze prevention and reduces cold filter plugging point

Crankcase Ventilation **Systems.**

Cummins Filtration crankcase ventilation systems use patented technologies to control oil drip and crankcase emissions in diesel engine applications.

Crankcase Ventilation:

- Eliminates oil lost from blow-by gases
- Reduces loss of oil that is historically released into the environment

Hydraulic **Systems.**

Through the use of the right choice of filter media, our products achieve higher efficiency and dust capacity with lower pressure drop characteristics than the competition. System performance, design flexibility and high quality are reflected in our diverse hydraulic filtration product family.

Benefits of hydraulic filters:

- Fleetguard hydraulic filters are manufactured to the highest standard of quality and meet global OEM specifications
- Our high performing synthetic products replace cellulose elements and provide up to 100x the filtration of fine particles without sacrificing any dirt-holding capacity

Fleetschool

Fleetschool Online Education.

As filtration technology constantly changes to keep pace with new engine technology, Fleetschool is your most dependable resource for updated product and market information. Fleetschool features easy to use, self-guided training modules that cover a wide variety of modern filtration and conditioning product topics. With short tutorials, self-assessments and online course monitoring, Fleetschool is an excellent training tool for individuals to become filtration experts from the convenience of their location.
